

# AT A GLANCE PUPPY DATA SHEET

CONGRATULATIONS on your new puppy!! This document is designed to help you maintain your puppy's health and wellness. Please bring this document along with your entire Southern Yorkies Puppy Notebook with you to your Veterinarian's office to make the transition an easy one.

**Should you have a puppy emergency, please contact me via phone, text or both. Otherwise, I am asking that you please direct ALL of your non-urgent questions via email: [southernYorkies@gmail.com](mailto:southernYorkies@gmail.com). If there is an emergency, then PLEASE do give me a call: 843.283.7607.**

Thank You,

Elizabeth Brigman

## **De-Worming Medication(s) Used:**

- Safeguard Goat Dewormer Suspension: 10% Fenbendazole as its active ingredient and can also be used to worm dogs. It is useful against the most common canine intestinal worms including whipworms, hookworms, roundworms and tapeworms. It is even effective at fighting giardia. Purchased at Tractor Supply
- Sulfamethoxazole: 400 mg, Trimethoprim 80 mg; Water-soluble, anti-bacterial antibiotic, Controls systematic and local infections. Purchased from Revival Animal Health
- Baycox Oral Suspension: (Toltrazuril) 5% solution is suitable for both therapy and metaphylaxis and acts as an effective tool for controlling coccidian-related problems.

## **Puppy Vaccine Used:**

- Duramune® Max 5 prevents Canine Distemper, Adenovirus Type 1 (Hepatitis), Adenovirus Type 2 (Respiratory Disease), Parainfluenza, Parvovirus. (Purchased from Revival Animal Health)

## **Flea & Heartworm Medication Used:**

- Advantage Multi® for Dogs provides broad-spectrum parasite protection in a convenient monthly application. It prevents heartworm disease, kills fleas, and treats and controls roundworms, hookworms, whipworms and sarcoptic mange in dogs. Purchased from your local Veterinarian or PetBucket.com; (Do NOT use Trifexis or Comfortis.)

## **Spay/ Neuter:**

- I recommend new owners to have their puppy spayed/ neutered AFTER all 42 adult teeth have erupted, typically around 6-7 months. By waiting to spay or neuter at this age, any retained baby teeth may also be removed while the puppy is under anesthesia. This is also when I recommend having the AKC Re-Unite microchip inserted.

**Next Worming Due:**

**Next Vaccine Due:**

**Next Flea Medication Due:**

**Nutritional Supplement:** *(encouraged)*

**Spay/ Neuter Date:**
